Test 15

Read the given text and answer the questions given below.

Christopher Columbus was probably the first to take cocoa beans from the new World to Europe in around 1502. But the history of the chocolate goes back at least 4000 years ! The Aztecs, who lived in America, thought that their bitter cocoa drink was divine gift from heaven. In fact the scientist Carolus Linnaeus named the plant Theobroma, which means “the food of gods”. Later people made food items like pies and cakes out of chocolate.

Today, two countries- Brazil and Ivory Coast- account for almost half the world’s chocolate. The United States imports most of the chocolate in the world. But, the Swiss eat most of the chocolate per person. The most chocolate eaten today is sweet milk chocolate, but people also eat white chocolate and dark chocolate.

Cocoa and dark chocolate are believed to help prevent heart attacks or keep them from happening. They are supposed to be good for the circulatory system. On the other hand the fat content of chocolate can cause weight gain, which is not good for people’s health. Other health claims for chocolate have not been proven, but some research shows that chocolate could be good for the brain.

Chocolate is a popular holiday gift. Chocolate is sometimes given for Christmas and birthdays. Chocolate eggs are sometimes given at Easter.

Chocolate is toxic to some animals. An ingredient in it is poisonous to dogs, cats, parrots, small rodents and some livestock. Their bodies cannot process some of the chemicals found in chocolate. Therefore they should never be fed chocolate.
